

BIG NEWS

Now you
can recycle more
plastics.

Introducing recycling service
for #3 through #7 plastics!

CITY OF MORGAN HILL
environ@ch.morgan-hill.ca.gov

**NEW!
BEGINNING**

**AUGUST
1ST**

**EXPANDED
PLASTICS
RECYCLING**

Now you can recycle more plastics than ever.

The City of Morgan Hill and South Valley
Disposal & Recycling are pleased to offer an
expanding plastics recycling program.

Now, in addition to being able to
recycle #1 and #2 plastics, you
can recycle #3 through
#7 plastics.

What types of plastics are usually recyclable?

We're glad you asked. This list includes
containers for beverages, bleach, catsup, cleaners,
cooking oil, washing detergents, liquor, lotion, motor oil,
mouthwash, shampoo, syrup bottles, baby wipe containers,
cottage cheese and yogurt cups, margarine tubs, milk and
water jugs, clear and Styrofoam take-out food
containers, Styrofoam "peanuts"
secured in a plastic bag (to help
keep them from getting
loose), empty flower
pots, large pieces of
Styrofoam.

DO YOUR PART!

Be sure all containers
are empty and clean.
Food containers must
be rinsed.

What types of plastic **CAN'T** be recycled through the expanded program?

Another good question. Please **do not** put the
following in your recycling container. These
items should be reused when possible or disposed
of as trash: **plastic bags**, disposable razors, shoes, pools,
tarps, PVC pipe or tubing, kitty litter tubs, garden hoses, black
microwave trays, toys, toothpaste and ointment tubes.

Please Note: Many grocery stores recycle plastic bags. Car batteries can
be recycled at the San Martin Transfer Station and even at some auto
body supply stores; Medical Waste has special disposal
requirements. Call your local service number to discuss your
options. Syringes should be placed in a rigid container,
labeled as such, and brought to the San Martin
Transfer Station for safe disposal.
